PROFILE

An ambitious, enthusiastic and committed Computer Science graduate who possesses a genuine interest and understanding of technology. Currently seeking a challenging work placement opportunity within a dynamic Tech firm which will offer early responsibilities, and the opportunity to develop practical computer skills.

EXPERIENCES

Php Backend Developer(Laravel) – 10/2020 until 03/2021
Company – Outkos
- My role as a Php developer was to build Rest Api using Laravel (& Lumen).
- Build microservices architecture.
- Create complex DB schema(logic) with scalability in mind.
- Write clean and reusable code.
- I had the responsibility to create detailed documentation for the endpoints so the front-end can integrate them.
